

MANJIT SINGH

SENIOR ANDROID DEVELOPER | TEAM LEAD | AI / LLM INTEGRATION

+91 8091706561 • mbmanjit5@gmail.com • India

ANDROID
Kotlin • Compose
AI • Firebase
CI/CD • Play Store

CORE SKILLS

ANDROID

Kotlin, Java, Android SDK, Jetpack Compose, Material 3, Navigation, WorkManager, Services

ARCHITECTURE

MVVM, MVI, Clean Architecture, SOLID, Repository Pattern, Modularization

DI

Hilt, Koin, Dagger

MODERN ANDROID

Coroutines, Flow, StateFlow, LiveData, ViewModel, Room, DataStore, Paging, Compose UI

NETWORKING

Retrofit, OkHttp, REST APIs, JSON, WebSockets, third-party integrations

FIREBASE / CLOUD

Authentication, Firestore, Realtime Database, FCM, Crashlytics, Analytics, Remote Config, Cloud Functions

AI / ML / LLM

OpenAI / GPT APIs, Gemini APIs, LLM integration, Prompt Engineering, Structured JSON, Embeddings, RAG, AI Agents, Tool Calling

TESTING

JUnit, Instrumentation, UI Testing, Debugging, Profiling, Crash Analysis

DEVOPS / RELEASE

Git, GitHub, GitHub Actions, CI/CD, Signing, APK/AAB, Play Console, Internal/Closed/Open Testing, Production Release

MONETIZATION

Google Play Billing, AdMob, App Open, Banner, Interstitial, Rewarded, Native Ads

OTHER

Google Maps, Location Services, ExoPlayer / Media3, Twilio, Agora, JIRA, Agile / Scrum, Code Review

EDUCATION

M.C.A.	Jan 2015
BSC (IT)	Jan 2012

LANGUAGES

Hindi • English

PROFILE

Senior Android Developer and Team Lead with 11+ years of mobile application development experience. Strong in Kotlin, Java, Jetpack Compose, modern Android architecture, REST APIs, Firebase, CI/CD, AI/ML and LLM API integration. Experienced in freelance delivery and part-time product work, team leadership, scalable architecture, third-party integrations, production troubleshooting, performance optimization and Google Play release management.

PROFESSIONAL EXPERIENCE

New Age - Part-time Android Developer

May 2026 - Present

- Contribute to Android application development, feature enhancement, troubleshooting and ongoing maintenance.
- Work with modern Android technologies, APIs and production issue resolution with the wider development team.

Freelance Android Developer

Jan 2024 - Present

- Deliver client Android projects from requirements and technical planning through development, testing, deployment and support.
- Build and maintain Kotlin/Java applications using Jetpack Compose, MVVM/Clean Architecture, Firebase, REST APIs and third-party SDKs.
- Integrate AI/LLM APIs, notifications, payments, maps, analytics, ads and cloud services as required.
- Manage Git-based development, releases, code quality and client communication.

RedBlox.io - Sr. Android Developer / Team Lead, Pondicherry

Aug 2022 - Present

- Lead Android development, architecture, code reviews, mentoring and production support.
- Build scalable applications with Kotlin, Jetpack Compose, MVVM/Clean Architecture, Coroutines, Retrofit, Firebase and DI.
- Drive CI/CD workflows, signing/release processes and Google Play deployment/testing.
- Troubleshoot production issues and optimize application performance.

Technofy India - Android Developer, Mohali

Aug 2019 - Jul 2022

- Developed high-performance Android applications and integrated REST APIs and third-party services.
- Implemented features, testing, debugging, performance improvements and application lifecycle support.

Absolve Tech - Android Developer, Mohali

Apr 2017 - Jul 2019

- Developed Android features, integrated third-party libraries/APIs, optimized performance and supported new Android versions.
- Contributed to testing, debugging, maintenance and post-deployment troubleshooting.

Picnframes Technologies - Android Developer, Mohali

Jul 2015 - Mar 2017

- Developed Android UI, business logic and local data layers using Android SDK.
- Participated in full SDLC, API/library integration, testing, debugging, deployment and application support.

SENIOR-LEVEL CAPABILITIES

Technical architecture • End-to-end Android development • AI/LLM feature integration • RAG / AI-agent concepts • API/backend integration • Firebase/cloud services • Authentication & authorization • Push notifications • Maps/location • Payments & subscriptions • Ads/monetization • Analytics & crash monitoring • CI/CD • Play Store publishing • Production monitoring • Performance optimization • Legacy app modernization • Team leadership • Freelance delivery • Mentoring • Code review
